

# BIOREMODELING

## A new anti-aging approach

Bioremodeling is an innovative approach to anti-aging treatments, which acts directly on skin laxity. PROFHILLO® offers a dual action thanks to its composition.

### BIOREGENERATING ACTION

resulting from a balanced concentration of low molecular weight hyaluronic acid which stimulates endogenous HA production.

### TIGHTENING EFFECT

resulting from high molecular weight hyaluronic acid which counteracts skin laxity while remodeling the face.

# INNOVATION

## Bioremodeling with immediate tightening effect

IBSA, leading pharmaceutical company in the production of hyaluronic acid, presents PROFHILLO®: a new ally against aging, which **nourishes the dermal cells** and **restores firmness of the skin**, with a prolonged duration.

## WHY PROFHILLO®

### It's biocompatible

Because it's composed of a highly pure grade hyaluronic acid produced by biofermentation.

### It's secure

Due to its high purity and absence of additives, PROFHILLO® offers greater safety and therefore reduced side effects.

### It's effective

The patented technology of PROFHILLO® offers a prolonged duration.

### It's innovative

- ✓ The composition: its unique with **64 mg of HA**, the result of patented technology
- ✓ The injection technique: Only **5 points** of injection are needed to offer a maximum comfort
- ✓ The treatment protocol: Visible results after only **2 sessions** (1 month)

## EVERY WOMAN IS UNIQUE

For this reason  
IBSA developed  
an exclusive  
injection technique,  
**customizable for  
each individual  
patient.**

IBSA has also  
designed a special  
app allowing the doctor  
to demonstrate to the  
patient the  
**5 areas of injection**  
and to follow the  
progress of the  
treatments.
